PRODUCT SPECIFICATION

catalog number: J75000

product description: H. pylori Antigen

lot number: [lot specific]

source: Derived from one single H. pylori colony; Cag+

form: Detergent extract of whole H. pylori cell sonicates.

buffer: 0.015M KPO₄, 0.85% NaCl, pH 7.4

preservative: 0.1% NaN₃

concentration: [lot specific] mg/mL (by Pierce BCA protein assay)

specificity: H. pylori specific

storage: -20°C or below

hazard/biohazard: This material contains sodium azide as a preservative; take appropriate precaution.

This material is extracted from whole H. pylori cells and should be handled with caution as potentially hazardous.
